**Fair Wear and Tear Criteria Rental Equipment**

The acceptable thresholds shown in the Criteria Table below are derived from “TG-06: COA Guidelines for Container Interchange Criteria CIC-2 2020” and “LR IMS30-04-61 In-Service Inspection of Offshore Containers 2023”. When interpreting the criteria for assessment of equipment condition the below exert from the “LR IMS30-04-61 In-Service Inspection of Offshore Containers 2023” is to be considered:

“The effect of two or more items of damage in the same structurally sensitive component, even though each is less than that specified in the above table, could be equal to, or greater than, the effect of a single item of damage listed in the table.....  
.....the overall deformation is the total deformation (single or multiple defects) combined on the same member, where such defects are located in close proximity, which is specified as being within 300mm of each other.”

The basis of the criteria below is for the suitability of equipment condition for in field service and continual DNV certification. OEG reserves the right to request the repair or replacement of its equipment ether in part or entirety, if the condition of the equipment, including missing or damaged accessories, jeopardise the integrity of OEG assets.

Item Number	Equipment Component	Requirement	Limits of Fair Wear and Tear
