

Custom fabricated containers

OEG designs, fabricates, modifies, and refurbishes certified containers and CCUs to meet project-specific operational, dimensional, and certification requirements.

SEPCO Certified Containers

SEPCO-certified offshore containers in standard sizes, including 6×6, 8×8, 8×10, and 8×20 units. These units are supplied with the required offshore lifting and mobilisation documentation package.

- Shell form
- NDE documentation
- Load test certificate
- Sling certification

DNV 2.7-1 CCU Refurbishment

We carry out repairs and refurbishment on customer-owned CCUs in accordance with DNV 2.7-1 requirements. Our services include weld repairs, padeye reconfiguration, blasting and painting, and other refurbishment works required to return

units to operational condition.

Custom DNV CCUs

OEG engineers and fabricates bespoke DNV 2.7-1. Our team works closely with customers to develop purpose-built units that meet operational, dimensional, and certification requirements.

Container Customization

Custom DNV and SEPCO containers for a wide variety of applications, including workshops, rigging lofts, storage units, and specialist operational spaces. Layouts are designed around customer-specific operational requirements, with durable finishes and practical

internal configurations.

- Installation of specialist insulation packages
- Electrical installations to Safe Area, IEC, and A60 standards
- Custom lifting systems, including jib cranes and trolley beams
- Internal fittings such as storage cabinets, aluminum workbenches, and toolboxes
- Custom angle-iron shelving, racking, and rigging pegs
- A range of interior finish options
- Recessed custom AC boxes, designed to suit AC unit size
