

# Sheave wheels

OEG's BlueManta sheave wheels direct the control line from the spooling unit into the well. All sheave wheels are designed and tested in accordance with DNV 2.22 and Lloyds code for lifting appliances in a marine environment (CLAME). The wheel's rollers can be made to suit any size of control line or hose. They come complete with keeper wheels to ensure the line does not jump out of the end wheels, gate access to insert the line, swivels, safety lines and a safety shackle to attach the safety line.
